

BROOK PUGMIRE

Profile

Versatile and well-rounded programmer with 5 years of academic training across a broad range of computer science disciplines. Experienced in diverse paradigms, methodologies, and programming languages, with a foundation that supports both depth and adaptability. Passionate about writing clean, efficient code and bringing structure and creativity to problem solving.

PROJECTS

REALISTIC ANIMAL BEHAVIOUR IN A RANCHING GAME

2024 | Solo Capstone Project - 14 weeks

Used: C#, Unity, Git, GitHub, Boids & AI Models, Documentation

- Led the full design & development
- Simulation project aimed at improving the realism of animal behaviour in video games
- Independently learned Unity & animation tools during development
- Wrote Boid behaviour from scratch
- Integrated multiple behaviour & environmental systems and designed logic for blending competing priorities
- Managed version control and iterative development through Git & GitHub
- Delivered regular progress reports & 32 page final report detailing design approach, technical difficulties & decisions.

TRAVEL APP GROUP PROJECT

2024 | Accenture Bootcamp - 5 days

Used: Trello, Figma, Canva, React, TypeScript, JSON, Javascript

- Collaborated in a team to design, develop, and present a gamified urban navigation app prototype
- Contributed to planning, UI design, coding, and documentation with support from industry mentors
- Followed Agile Scrum practices with daily stand-ups and team syncs to drive progress and coordination

TEXTEDITOR GROUP PROJECT

2023 | University Project

Used: Java, Git, GitHub, & Jira

- Collaborated in a team to develop a Java-based text editor as part of a group assignment
- Utilized Git, GitHub, and Jira for version control, task management and issue tracking.
- Contributed to coding, testing, and integration of features, ensuring smooth functionality and on-time delivery.

SKILLS

PROGRAMMING LANGUAGES

C, C++, C#, Java, Python, Haskell, HTML, CSS, Javascript, YAML, XML

TOOLS

Git, Github, Unity, Jira, Maven, JUnit, Docker, PMD, Log4j, Gradle

CONCEPTS

Object-Oriented Programming, Agile Methodologies, Continuous Intergration, Threads and concurrency, Orthogonality, System Analysis

EDUCATION

SECONDARY SCHOOL

Freyberg Highschool

2007 - 2010

BACHELOR OF INFORMATION SCIENCE

Computer Science Major
Massey University

2020 - 2025

BROOK PUGMIRE

EXPERIENCE

CONTENT CREATOR

2017 - 2020

Twitch & Mixer

- Produced, scheduled, and broadcast video content to a remote website on a weekly or daily basis.
- Analyzed audience retention data and viewer trends to produce targeted content, and change content to reflect audience wants and needs.
- Hands on experience with video and audio capture equipment, including web broadcasting software
- Created custom viewer interaction software and handled its maintainance and user prompted improvements

EDUCARE ASSISTANT

2016 - 2017

Lolipops Educare

- Assisted lead teachers in implementing age-appropriate activities to promote cognitive, social, and emotional development.
- Supported individualized learning plans for children with diverse needs, fostering inclusive and supportive interactions.
- Collaborated with colleagues to create a cohesive and supportive team environment, contributing to the overall positive atmosphere of the center.

CUSTOMER SERVICE

2013 - 2013

Studylink

- Managed online application processing for student loans and benefits, ensuring accuracy and efficiency in handling sensitive financial information.
- Proactively contacted clients to gather additional required documentation and information, demonstrating strong communication and interpersonal skills.
- Provided comprehensive assistance and guidance to students and their families regarding eligibility criteria, fostering positive relationships and trust.

SKILLS SUMMARY

PROBLEM SOLVING

I thrive on tackling complex challenges and developing innovative, efficient solutions. My passion for programming lies in crafting elegant code that enhances both performance and functionality. Whether optimizing algorithms or debugging tricky issues, I bring focus and determination to every task.

TEAMWORK

I've developed strong collaborative skills through diverse experiences, from education and government roles to Twitch content creation and university projects. I'm comfortable contributing in team settings, communicating clearly, and helping coordinate efforts toward shared goals. These experiences have shaped my ability to work effectively in dynamic, team-oriented environments.

C++

C++ has been a core part of my academic journey, used in everything from data structures and algorithms to concurrency and complexity analysis. I'm confident using C, C++, and C# to build efficient, well-structured programs. My deep familiarity with C++ makes it a key strength in solving technical problems.

JAVA

I've used Java extensively in coursework, including object-oriented design, web apps, and graphics programming with Java Swing. Projects have explored everything from game physics to 3D rendering. I've also worked with Java in team environments using tools like Git, GitHub, Jira, and Maven.
